# VOYAGE TO THE HEART OF MATTER

THE ATLAS EXPERIMENT AT CERN  
ANTON RADEVSKY AND EMMA SANDERS

280 x 220 mm (11 x 8.6 in) • 8 pop-up pages  
lavishly illustrated in full colour  
ISBN 13: 978-1906506-12-4 • Hardcover • £24.95  
NEW EDITION – OCTOBER 2010

**One of the most significant technological wonders of the modern world leaps from the page in 3D pop-up.**

In this unique collaboration between CERN and renowned paper engineer Anton Radevsky, 7000 tonnes of metal, glass, plastic, cables and computer chips leap from the page in miniature pop-up, to tell the story of CERN's quest to understand the birth of the universe. Protons, travelling at nearly the speed of light, collide within the heart of the ATLAS detector, sending out showers of debris to recreate 40 million times a second the conditions that existed millionths of a second after the Big Bang, the event that set our universe in motion. Now all ages can join the ATLAS experiment on this fascinating journey to the beginnings of the universe in this astonishing pop-up book.

**ANTON RADEVSKY** is a pop-up engineer and illustrator and lives in Sofia, Bulgaria. His previous books include The Modern Architecture Pop-Up Book, The Pop-Up Book Of Space Craft and The Wild West Pop-Up Book.

**EMMA SANDERS** is the head of Microcosm, CERN's museum of particle physics in Geneva, Switzerland.

*The Large Hadron Collider leaps off the page*  
WIRED

*[The book] neatly combines the two reasons why the LHC makes people go 'wow': the exotic sounding physics [...] and the sheer magnificence of the machinery itself.*

THE TIMES

*Among popular books about particle physics, this one stands out – quite literally*

NEW SCIENTIST

*Each pop-out genuinely illuminates the workings of the detector and the interactions of the particles it hopes to find*
